

CLAIMS

What I claim is:

1. In combination, a host organizer and an ancillary article removable from said host organizer,
said host organizer including –
 - an organizer casing having an exterior surface,
 - an organizer pocket located on the exterior surface of the casing, the pocket having an exterior surface on which first releasable attachment means is mounted, and
 - an organizer flap extending from the casing and over at least a portion of the exterior surface of the pocket, the flap having an interior surface on which second releasable attachment means is mounted, the second attachment means being complementary to and alignable with the first attachment means such that the flap is releasably attachable to the pocket;
- said ancillary article including –
 - a body, and
 - an article flap extending from the body, the article flap having interior and exterior surfaces on which third and fourth removable attachment means are mounted, respectively,
 - the third attachment means being complementary to the first attachment means and
 - the fourth attachment means being complementary to the second attachment means,
 - the body being configured to fit in the organizer pocket,
 - the article flap being adapted to at least partially overlap the organizer pocket such that the third and the first attachment means are substantially aligned and the article flap is releasably attachable to the organizer pocket,

30 the organizer flap being adapted to at least partially overlap the
31 article flap such that the second and the fourth attachment
32 means are substantially aligned and the organizer flap is
33 releasably attachable to the article flap.

1 2. The combination of claim 1, wherein said host organizer is a loose-leaf
2 binder.

1 3. The combination of claim 1, wherein said host organizer is a briefcase.

1 4. The combination of claim 1, wherein said host organizer is a handbag.

1 5. The combination of claim 1, wherein said ancillary article is a wallet.

1 6. The combination of claim 1, wherein said ancillary article is a purse.

1 7. The combination of claim 1, wherein said ancillary article is a PDA.

1 8. The combination of claim 1 wherein said ancillary article is a calculator.

1 9. The combination of claim 1 wherein said ancillary article is an electronic
2 organizer.

1 10. The combination of claim 1, wherein said ancillary article is a notebook.

1 11. The combination of claim 1, wherein said ancillary article is a cell phone.

1 12. In combination, a binder and an ancillary article removable from said binder,
2 said binder including –

3 a binder cover having an exterior surface,

4 a binder pocket located on the exterior surface of the cover, the

5 pocket having an exterior surface on which first releasable

attachment means is mounted, and
a binder flap extending from the cover and over at least a portion
of the exterior surface of the pocket, the flap having an interior
surface on which second releasable attachment means is mounted, the
second attachment means being complementary to and alignable with
the first attachment means such that the flap is releasably attachable to
the pocket;
said ancillary article including –
a body, and
an article flap extending from the body, the article flap having
interior and exterior surfaces on which third and fourth
removable attachment means are mounted, respectively,
the third attachment means being complementary to the
first attachment means and
the fourth attachment means being complementary to the
second attachment means,
the body being configured to fit in the binder pocket,
the article flap being adapted to at least partially overlap the binder
pocket such that the third and the first attachment means
are substantially aligned and the article flap is releasably
attachable to the binder pocket,
the binder flap being adapted to at least partially overlap the article
flap such that the second and the fourth attachment means
are substantially aligned and the binder flap is releasably
attachable to the article flap.

13. The combination of claim 12, wherein said ancillary article is a wallet.

14. In combination, a binder and a wallet removable from said binder,
said binder including –
a binder cover having an exterior surface,
a binder pocket located on the exterior surface of the cover, the

5 pocket having an exterior surface on which first releasable
6 attachment means is mounted, and
7 a binder flap extending from the cover and over at least a portion
8 of the exterior surface of the pocket, the flap having an interior
9 surface on which second releasable attachment means is mounted, the
10 second attachment means being complementary to and alignable with
11 the first attachment means such that the flap is releasably attachable to
12 the pocket;

13 said wallet including –

14 a wallet body, and
15 a wallet flap extending from the body, the wallet flap having
16 interior and exterior surfaces on which third and fourth
17 removable attachment means are mounted, respectively,
18 the third attachment means being complementary to the
19 first attachment means and
20 the fourth attachment means being complementary to the
21 second attachment means,
22 the body being configured to fit in the binder pocket,
23 the wallet flap being adapted to at least partially overlap the binder
24 pocket such that the third and the first attachment means
25 are substantially aligned and the wallet flap is releasably
26 attachable to the binder pocket,
27 the binder flap being adapted to at least partially overlap the wallet
28 flap such that the second and the fourth attachment means
29 are substantially aligned and the binder flap is releasably
30 attachable to the wallet flap.

1 15. The combination of claim 14, wherein the binder cover forms an interior
2 wall of said binder pocket.

1 16. The combination of claim 14, wherein the first, the second, the third, and
2 the fourth attachment means are snap fastener elements.

- 1 17. The combination of claim 14, wherein the wallet flap is a closure flap for
2 said wallet.
- 1 18. The combination of claim 14, wherein the wallet body is configured to fit
2 substantially inside the binder pocket.
- 1 19. The combination of claim 14, wherein said binder is a loose-leaf binder.
- 1 20. The combination of claim 14, wherein said binder further includes a spine, the binder
2 cover being movably mounted to the spine, and wherein the binder pocket contains a
3 pocket opening, the pocket opening being adjacent to the spine.
